(54) Title: **MOBILE MEDICAL APPARATUS**

(57) Abstract: A mobile medical apparatus comprising a moving mechanism for moving the apparatus across a surface on which the apparatus can stand and a securing mechanism for securing the apparatus in a position on the surface, and an actuator operated mechanism for selective engagement of the moving mechanism or the securing mechanism, an actuator of the actuator operated mechanism being movable in a first downwards motion from an unlocked position, at which one of the moving mechanism or the securing mechanism is engaged, to a locked position, at which the other of the table moving mechanism or the table securing mechanism is engaged, and then further downwardly in a second downwards motion to unlock the actuator mechanism and permit the actuator to return to the unlocked position.
